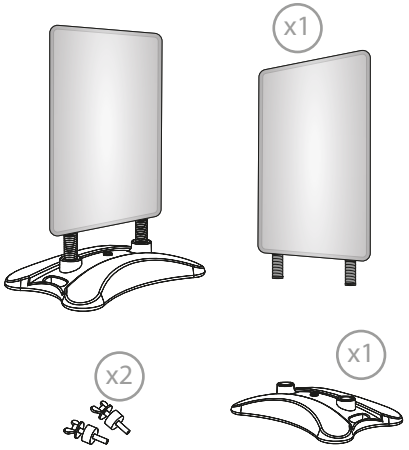
1. **CONTENT** AND TEXTIL **GRAPH**

CONTENT

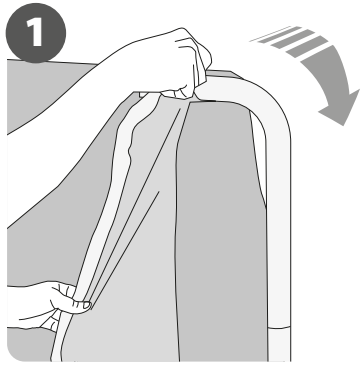
Open the bag, check the content of the bag and take out all the pieces carefully.

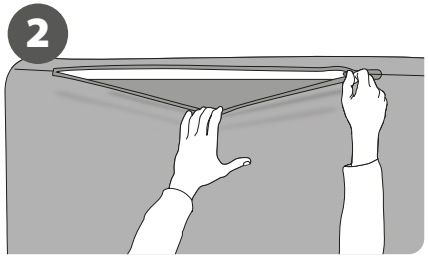
The Mikonos Sidewalk features a lightweight aluminum structure with a refillable plastic base that assembles in a few minutes by joining the ends marked with pairs of numbers and colours. Simply stretch the wrap over the completed base and it's ready to use. The aluminium structure is affixed to the base with large springs, so it stays stable in windy conditions. A Nylon Carrying bag is included for an easy storage and transportation.



GRAPHIC ATTACHMENT **BY TENSION FABRIC**

To adjust the fabric graphic (sold separately) to the structure, simply wrap the aluminum frame from the top to the bottom or left to right (according to the model) and then close carefully the back zip.





For those cases in which the graphic is **supplied by the client,** we recommend making use of the materials listed in the following **QR code** (scan for downloading Excel file). Please contact us or visit **www.cashdisplay.com** for more information.
